

THE UNITED LODGE OF THEOSOPHISTS

Declaration

The Policy of this Lodge is independent devotion to the cause of Theosophy without professing attachment to any Theosophical organization. It is loyal to the great Founders of the Theosophical Movement, but does not concern itself with dissensions or differences of individual opinion.

The work it has on hand and the end it keeps in view are too absorbing and too lofty to leave it the time or inclination to take part in side issues. That work and that end is the dissemination of the Fundamental Principles of the Philosophy of Theosophy, and the exemplification in practice of those principles, through a truer realization of the SELF; a profounder conviction of Universal Brotherhood.

It holds that the unassailable basis for union among Theosophists, wherever and however situated, is "similarity of aim, purpose and teaching," and therefore has neither Constitution, By-Laws nor Officers, the sole bond between its Associates being that basis. And it aims to disseminate this idea among Theosophists in the furtherance of Unity.

It regards as Theosophists all who are engaged in the true service of Humanity, without distinctions of race, creed, sex, condition or organisation, and

It welcomes to its association all those who are in accord with its declared purposes and who desire to fit themselves, by study and otherwise, to be the better able to help and teach others.

"The true Theosophist belongs to no cult or sect, yet belongs to each and all."

The following is the form signed by Associates of the The United Lodge of Theosophists:

Being in sympathy with the purposes of this Lodge, as set forth in its "Declaration," I hereby record my desire to be enrolled as an Associate, it being understood that such association calls for no obligation on my part, other than that which I, myself, determine.

Program for

January - February - March 2023

The mind is therefore only his instrument for comprehending things and natures on the plane upon which it is used. That instrument can be strengthened and improved; it is and must be something permanent which uses, strengthens, and improves the instrument. The mind might be likened to a telescope in use by the Man, the Perceiver, in order to be able to perceive the nature of the things about him. He can act only in accordance with what He perceives through the telescope. If the telescope is not properly adjusted or out of focus, the perception will be out of true, and wrong action will follow. The Perceiver must therefore learn, by experience and through the experience of others like himself with similar instruments, the proper adjustment and focussing of the instrument upon which right perception and action depend.
